PROFESSIONAL EXPERIENCE

Software Integration Consultant, EDICOM — Mexico

Jan 2026 – Present

- Implementation and configuration of **EDI solutions** for enterprise system integrations and automation.
- Technical requirements analysis, mapping, and validation to ensure interoperability across business systems.
- Collaboration with technical teams to optimize processes and ensure compliance with international standards.

Intern, Women's Center FIU — Miami, FL

Mar 2025 – Dec 2025

- Coordinated events and galas, managing timelines and stakeholder communications.
- Analyzed internal processes and identified opportunities to increase student engagement through social media and campus initiatives. Provided frontline student support, crisis response, and resource referrals.

Project Manager, MexaLab Clinical Laboratory — Mexico City, MX

Dec 2021 – Dec 2024

- Led **end-to-end projects**, coordinating cross-functional teams (marketing, healthcare, HR). Built and managed a team of **15+ members**.
- Implemented SEO and digital marketing strategies, achieving **+177.8% web clicks**, **+52.3% social engagement**, and **+22.7% revenue growth**. Documented workflows, contracts, and operational processes.
- Ensured regulatory compliance for government bids and campaigns. Negotiated and closed commercial agreements.

RELEVANT PROJECTS

FIU SURF — **Director of Technology**. Led development and deployment of the website using **React + Tailwind CSS**, calendar integration, e-commerce store, and social media integrations. Scaled to **1,000+ concurrent users**.

ALPFA FIU — Developer, building scalable features for events, membership systems, restricted content, and sponsor integrations for the **largest ALPFA student chapter in the U.S. (600+ members)**.

LifeQuest (ShellHacks 2025) — Gamified Web/App with **AI**. Developed frontend and backend with real-time task orchestration using AI agents (Google ADK), voice/chat interaction, and mini-game integration.

CASTIQ — Co-Funder, building a startup. **Sole architect and engineer** responsible for architecture, development, and deployment of an app using Flutter + Firebase, data management, and interactive UI/UX. Team integration and partnerships.

VibeRdy.xyz — Hackathon project. Developed frontend (React) and backend (Python), deployed on **AWS**. Built automated testing infrastructure delivering insights in under **3 minutes**.

RunwAI — AI Personal Stylist — Developed a web application delivering personalized outfit recommendations using Python (backend) and React (frontend). Coordinated a team of 12+ members over 3 months.

Friend Finder: 2nd Place EmpowHer Hackathon Built a **student-centered platform** addressing social isolation among international and commuter students. Conducted user problem analysis based on interviews.

MEDIBRIDGE: Ford Philanthropy Fellowship (Representing FIU) Startup Competition. Developing a **community health access platform** centralizing low cost and free clinics to make healthcare accessible in the US. Conducting healthcare access gap analysis to address barriers for low income populations.

GreenBee: Creators Payout Developed a creator payout and compliance platform with a team. Claim-based payout flow allowing creators to select preferred payment methods, reducing failed transactions. Integrations for payments, **and automated tax form collection (W-9, W-8BEN, 1099 support)**. Scoped API integrations for social performance tracking and defined low-friction onboarding strategy.
